AFTERCARE

AFTERCARE

PIERCING

AFTERCARE FOR PIERCINGS

AFTERCARE GUIDE:

- ▶ Clean **TWICE a DAY** for **6 weeks**

- ▶ Spray **after care solution** onto the area front and back and **leave for 1 minute.**

- ▶ Use 1-2 cotton buds, wet the tip with the spray and **clean around both sides of the piercing to remove any crust or discharge.** (Use a fresh tip for each side)

- ▶ **Use the spray in between** for example lunch time and dinner time, just spray the front and back and **do not clean with cotton buds**, this will soothe the piercing and keep it clean.

- ▶ After the initial 6 weeks **continue to use the cleaning spray** for a further 6 weeks, **you must stop using the spray after 12 weeks.**

- ▶ Don't change your piercing for **6 weeks minimum.**

- ▶ **Don't take the jewellery out** as it will close up.

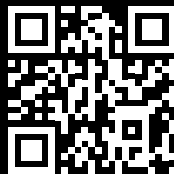

- ▶ Any **SWELLING** problems come back to Kookie Tattoo. **Do not seek PIERCING help elsewhere.**

- ▶ **Don't twist or play with the piercing** as it will swell and may become **INFECTED.**

- ▶ Bleeding is normal and we recommend compressing the area until it stops. **It can take up to 5 minutes.**
